RETROFIT

WORK WITH US

Are you a community-led organisation working on climate action or energy efficiency? Are you looking for a trusted partner to provide expert advice on home energy improvement—and help to engage local people? Loco Home Retrofit can help.

WHO WE ARE

Loco Home Retrofit is a not-for-profit co-operative with over 300 members who care about climate action, housing standards and community wealth building.

We provide independent, expert advice to help people make home energy upgrades like insulation, solar panels, and heat pumps—with practical support along the way.

We check eligibility for funding and connect people with quality-assured installers.

OUR GOAL?

TO HELP PEOPLE
AND
COMMUNITIES
CUT CARBON,
LOWER ENERGY
BILLS AND BUILD
CLIMATE
RESILIENCE.

HOW WE HELP

Loco Home supports projects that aim to reduce energy use and change how we heat our homes.

Domestic heating is a major source of carbon emissions—yet many homes are still cold, inefficient and expensive to run. By partnering with us, your project can help homeowners cut emissions, reduce bills, improve comfort and health, and build local skills for a greener economy.

We work with:

Local authorities – to help them meet energy efficiency, fuel poverty and sustainability goals by raising awareness of the benefits of home energy improvement.

Community groups – to strengthen local climate action by providing retrofit advice to homeowners and delivering engagement activities that boost participation.

PARTNERING WITH LOCO HOME

You can commission Loco Home as a delivery partner to support community engagement.

We bring:

- Technical knowledge and retrofit expertise
- Expert-led outreach activity
- Tools to build confidence and help people take action

Whether your project is underway or just getting started, we are ready to be part of your project team and delivery plan.

OUR TRACK RECORD

We have successfully delivered home energy community engagement projects for:

- Glasgow City Council
- East Renfrewshire Council
- South Lanarkshire Council
- The Scottish Government

OUR APPROACH

We know that trust and local relationships are key to success. That is why our engagement work is place-based, collaborative and designed to meet people where they are.

We offer:

- education sessions on home energy efficiency, low-carbon heating, retrofit and climate change adaptation
- open-home events showcasing real-life retrofit stories
- local talks, stalls and workshops
- outreach through trusted community networks
- access to resources to help homeowners get started

OUR COSTS

Loco Home support is always tailored to your project's goals and budget.

We will shape the engagement approach together and provide clear costings through a partnership agreement.
